

MGS Quick Guides

April 2020

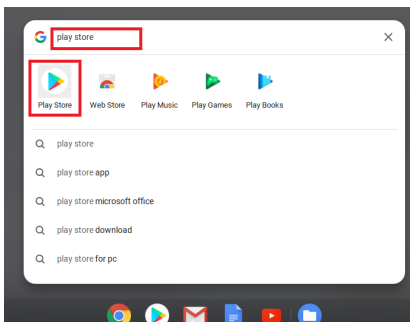

Installing Apps on Chrome OS

Installing applications on Chrome is different to how you would do it on Windows

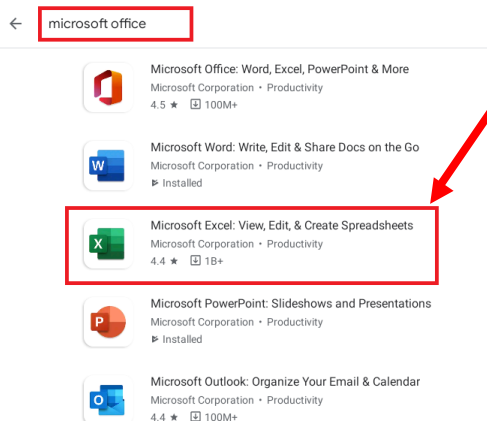

Click on the app launcher:

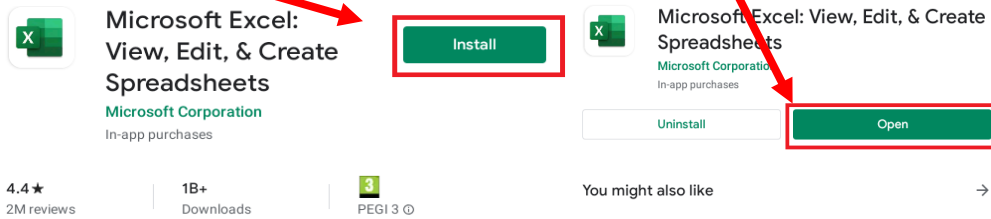

Search for the Play Store:

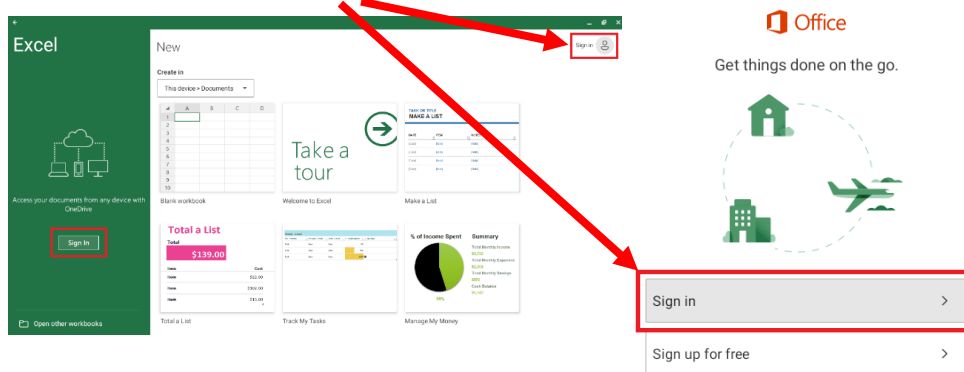

Once on the Play Store you can search for the app you want. For this example, we're using Microsoft Office. Click on which app you want.

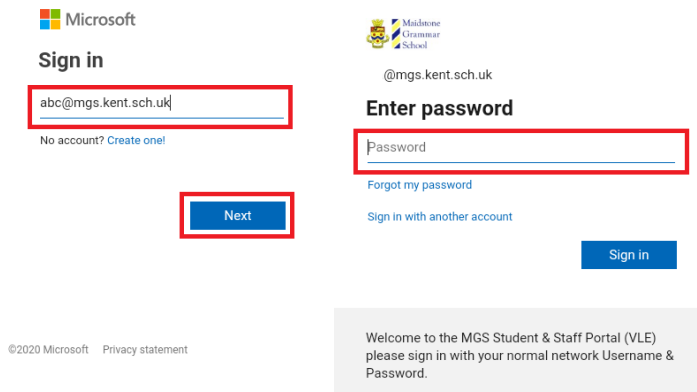

Click on the 'Install' button and once it's installed you can open it to start the app:

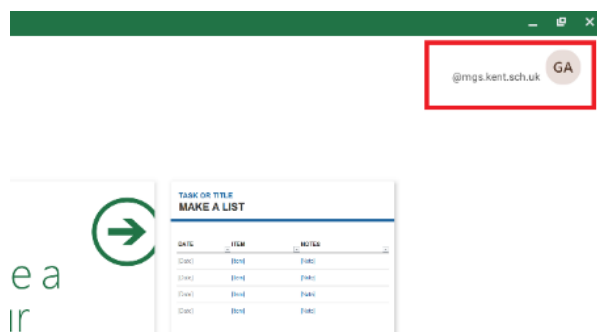

Once open, you can sign in to your school account:

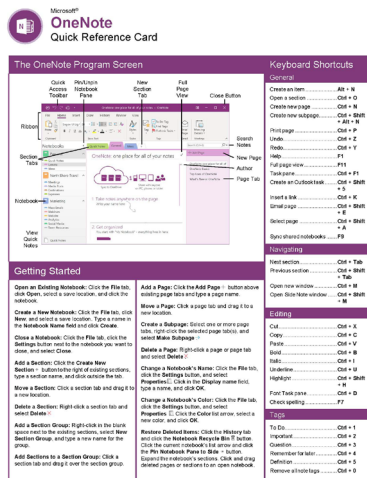

Enter your Office 365 Details:

You're now logged in and ready to use:

About MGS QuickGuides

MGS QuickGuides are a series of self-help documents designed to either show hints and tips on making better use of IT in your role in school or to show you something completely new. The main objective is to make you more efficient in your use of IT and therefore more confident and less stressed in your use of Technology. The MGS IT Dept will issue and update these guides as new features are released or a particular program option changes. If you would like a guide on a particular subject, please email.
